

How to Draw Quarter Notes

The Steps

1. Draw a circle.
2. Color it in!
3. Draw a stem on the right side going up.

*Be sure the stem is on the side of the circle, not in the middle. It should not look like a lollipop!

Trace the dots, then color in the circles.

The stems can also go down. But they go down on the LEFT!
Trace the dots and color in these quarter notes.

Draw 5 quarter notes below. You may choose if the stems go up or down.
