This book is dedicated to my mom and dad, Dr. Fred and Ruth Coleman who were the best practice partners I could have had. They sat through countless lessons, practice sessions, recitals and were my biggest cheerleaders. Without their sacrifice and commitment, I would not be the musician or teacher I am today. Thank you, Mom and Dad!

Thank you to my students who have tested these pages, found my mistakes and typos, and made these pages better. Thank you to my cousin and fellow Suzuki teacher, Ashley Poppe, who spent some late nights and lots of messaging helping me think through these pages. Thank you also to my mom who has helped craft sentences and edited each draft. Lastly, thanks to my husband, Matt, who has encouraged me and supported me when I was ready to give up on this big project.

Aural Skills recordings: Kristin Campbell

To the student:

Welcome to the Magic of Music Theory! Did you know that when you write things on paper it helps you remember them? This book is to help you remember things that you have learned in your lesson about your violin. This book will help you learn how to read and write music. Your practice partner will help you to read and do each lesson. If you have any questions, be sure to ask your teacher. When you finish this book, you will know and understand more about your violin and playing music. It's like magic, the magic of music theory!

To the practice partner:

You are the violin hero. Practicing isn't always fun, and it's not always easy. But in this journey of learning to play the violin, you get to walk alongside a child and give them the gift of music that will last for a lifetime.

My hope with this series is that it creates happy memories as you work through the book together. Playing games, reading stories, coloring, listening to music, learning how to draw and write music. Depending on age and reading ability, you may need to read the pages to the student. You can learn along with them. Don't be afraid to help and lead the student to the answer. These might new concepts and your child may not grasp it the first time it is introduced. That's ok! You will find a lot of review built in through out the book and they will begin to understand and remember. This is the process of learning.

Keep theory time short! You can choose to do the lesson at the end of one practice session, or you could choose to divide it up with just a little bit each day. It's up to you. Ask your teacher if they would like to do the "What Do You Hear?" pages in the lesson or if you should do them at home. You can access videos online or download free mp3 tracks with each question played on a violin. The answers for each question are given on the video/ track, so that the student gets immediate feedback in the learning process. I hope you enjoy the magic of learning music theory.

To the teacher:

I created this series because I realized that my students needed some basic skills before starting note reading. I needed something they could do at home, so I wasn't giving up valuable lesson time. By writing and drawing, I wanted to engage a different part of their thinking in the music learning process. This series teaches students recognize, draw music notation, symbols, reading notes on the staff and relates it to the fingerboard. The aural skills pages, "What Do You Hear?" can be done in the lesson, through online videos or using free mp3 tracks. The QR code will take you to the online video. To download the mp3 tracks visit horsehairmusic.com. Suggested recordings are linked to online videos to listen to while doing the coloring pages, but feel free to select your favorite artist or recording to share with your student.

You can also find the games and flashcards as a pdf download at horsehairmusic.com. This allows you to download and print the games in color or print the flashcards on heavier cardstock.

Lesson 1

There are 4 different instruments in the **string family**: the violin, viola, cello, and bass.

The **violin** is the smallest member of the string family and plays the highest notes. People who play the violin are called violinists.

The **viola** [vee-oh-la] is a little bigger than the violin and can play 5 notes lower than the violin. The player rests the instrument on their shoulder for both the violin and viola. People who play the viola are called violists [vee-oh-lists].

The **cello** [chel-lo] plays lower notes than the violin or viola. A person who plays the cello is called a cellist [chell-ist]. The cellist sits down to play. Using a metal stick, called an endpin, rests on the floor allowing the cello to rest between the player's knees.

The **double bass** is the largest member of the string family and plays the lowest notes. Sometimes we call it "bass" for short. Honour this word "base," like baseball, not "bass" like the fish. The player stands or sits on a tall stool to play. People who play the bass are called bassists [base-ists].

The string family spends a lot of time playing together. It is important that we get to know and understand the other instruments in our string family. When a group is made up of only stringed instruments, it is called a **string orchestra**. When the string family plays with brass instruments (trumpets, trombones, French horns, tubas), woodwind instruments (flutes, oboes, clarinets, bassoons), and percussion instruments (drums, triangle, xylophones, cymbals, piano) it is called a **symphony** [sim-phone-ee] **orchestra**.

Here are the parts of the violin and the bow.

1. Point to each one and say its name.

2. Draw a line from the term to the correct part on the violin and bow.

Lesson 2

What makes music? There are four elements that make music.

1. **Pitch** is the sound of each note. A group of pitches makes a **melody**.
Pitches can move up, down, or stay the same in a melody.
2. **Rhythm** is how long or short each pitch in the melody is held.
3. **Dynamics** means volume. It is how loud or soft to play the notes.
4. **Harmony** is when two or more notes sounds together.

To identify pitches, we use the first seven letters of the English alphabet.

1. Write the first seven letters of the alphabet in the circles to be the music alphabet.

There is NO H in the the music alphabet! We stop at G. When you get to G, start over at the letter A. We keep repeating the first seven letters.

2. Point to each letter and say the music alphabet out loud 2 times.

A B C D E F G A B C D E F G

3. Who is missing? Fill in the missing letters.

A ____ C D E ____ G A B C ____ E F G

A B ____ D E F ____ A B C D ____ F G

____ B C ____ E F G A ____ C D E F ____

A B C ____ E ____ G ____ B C D ____ F ____

Fingerboard Power!

Each string on a stringed instrument sounds a pitch which has a letter name. When we play these strings with no fingers on the string, they are called **open strings**. Look at the open strings for each instrument in the string family.

Violin

Viola

Cello

Bass

4. There are three open strings that are the same letter on each instrument. What are the open string letters that all stringed instruments have in common?

5. Draw a line from the term to the correct part of the violin.

Lesson 3

To play the violin, the left hand holds the violin, and the right hand holds the bow.

Left Hand

Right Hand

1. Write an "L" on the left hand. Write an "R" on the right hand.

Each finger on the left hand has a number.
The circle beside each horizontal line on the
fingerboard shows where each finger is placed
on the fingerboard.

2. Draw a line matching the finger number to the
number in the circle.

3. Write the finger number in each circle by the fingerboard. Write the correct finger number on each finger. Draw a line from the finger to the matching finger number by the fingerboard.

4. Color the left hands green and the right hands purple.

What do you hear? #1

You will hear 3 notes. If the notes you hear are high, color the bird. If the notes you hear are low, color the worm.

1.

2.

3.

You will hear 3 notes. If the notes you hear are loud, color the boy yelling. If the notes you hear are soft, color the girl reading.

4.

5.

6.

You will hear a rhythm pattern on an open string. Color the house of the open string that you hear.

7.

9.

* Additional ear training exercises can be found on p. 92 and 93.

Choose from these examples. For questions 4 – 6, add a dynamic *f* or *p*. For questions 7 -9, choose a rhythm pattern to play on an open string.

SAMPLE

Lesson 4

Rhythm is how long or short we hold a pitch. Music notes show the player how long or short to hold a note. Each part of the note has a name. The round part is the **note head**. The **stem** is the straight line. Rhythm is measured in beats. Just like your body has a beat, a heartbeat, music also has a beat. Different notes show us how long or short to hold each note. Each note is held a specific number of beats.

This is a **quarter note**.
A quarter note gets
1 beat.

1. Trace the dots. Color in each note head to make it a quarter note. Write a 1 in the heart under each quarter note.

2. Clap each note and say its name, "quarter." 3. Clap on each note and say its beat, "1."

How to draw a quarter note:

Step 1: Draw a circle.

Step 2: Color the circle.

Step 3: Draw a stem going up on the right side of the note head or down on the left side of the note head.

"stems go up on the right" or "down on the left"

4. Draw one quarter note in each box. Draw a circle and color it in. Add a stem going up on the right or down on the left.

Up Stem

Up Stem

Down Stem

Down Stem

This is a **half note**.
A half note gets **2** beats.
The half note's note head is **NOT** colored in.

5. Use your pencil to trace the dots, but do NOT color in the note head. Write its beats "1-2" in the heart.

6. Clap 1 time and hold your hands together for each half note and say its name, "half-note."

7. Clap 1 time and hold your hands together for each half note and say the beats, "1-2."

half-note
(clap-hold)

half-note
(clap-hold)

half-note
(clap-hold)

(clap-hold)

(clap-hold)

8. Draw a half note in each box. Do NOT color in the note head.

Up Stem

Up Stem

Down Stem

Down Stem

Lesson 5

Dynamics means volume. We use Italian words to show what dynamic to play. **Forte** [for-tay] means loud. **Piano** [pee-an-oh] means soft. Only the first letter of each word written in a fancy script is used to show the dynamic.

f = *forte* = loud

p = *piano* = soft

Circle the dynamic that describes the picture, ***f*** for loud or ***p*** for soft.

<p>1.</p>  <p><i>f</i> or <i>p</i></p>	<p>2.</p>  <p><i>f</i> or <i>p</i></p>
<p>3.</p>  <p><i>f</i> or <i>p</i></p>	<p>4.</p>  <p><i>f</i> or <i>p</i></p>
<p>5.</p>  <p><i>f</i> or <i>p</i></p>	<p>6.</p>  <p><i>f</i> or <i>p</i></p>

7. What is an activity you do that is *forte*? _____

8. What is an activity you do that is *piano*? _____

9. Draw a line from the term to the correct part of the bow.

stick horsehair frog wrapping screw grip tip

10. Write one letter of the music alphabet in each train car. Then read the music alphabet out loud 1 time.

11. Write one letter in each train car of the music alphabet going backwards. Then, read it out loud 3 times.

12. Draw a circle around the notes with correct stems. Draw an X through the notes with incorrect stems.

13. The music alphabet can begin on any letter in the music alphabet. Read out loud the following music alphabets that go up beginning on a letter other than A.

C D E F G A B C D E F G A B C

F G A B C D E F G A B C D E F

14. Write the music alphabet going up beginning on E.

Lesson 6

1. Write the number of beats for each note in the heart.

2. Write the number of beats for each note in the hearts, then add them together.

3. Clap the notes and say their beats. Then clap and say their names.

4. Draw the note that matches the number of beats. 5. Fill in the blanks.

Stems go _____ on the right,

or _____ on the left.

This is a **dotted half note**. It is a half note followed by a dot.
It gets 3 beats. The dot ALWAYS goes on
the right side of the note head.

6. Trace the dotted half notes. Write the beats in the hearts.

7. Clap 1 time and hold your hands together and say "half-note-dot."

half - note - dot half - note - dot
(clap-hold-hold) (clap-hold-hold)

8. Clap 1 time and hold your hands together and say the beats "1-2-3"

9. Draw a dotted half note in each box. Remember, the dot is ALWAYS on the right.

This is a **whole note**.
A whole note gets 4 beats.
A whole note does not have a stem.

10. Trace the whole notes and write the beats in the blank under each note.

11. Clap 1 time and hold your hands together and say, "whole-note-4-beats."

whole - note - 4 - beats
(clap - hold - hold - hold)

12. Clap 1 time and hold your hands together and say the beats, "1-2-3-4"

(clap - hold - hold - hold)

What do you hear? #2

You will hear several notes for each box. When you hear a long note, draw a line. When you hear a short note, draw a dot. Draw all the notes that you hear, in the order that you hear them.

Long Note = _____ Short Note = •

1.

2.

3.

4.

The Magic of Music Theory Primer - © 2024 Horseshoe Music. Photocopying prohibited.

* Additional ear training exercises can be found on p. 94.

Choose from these examples.

Lesson 7

SPEED
LIMIT
45

In music, the speed of the music is called the **tempo**. Like dynamics, Italian words are used for tempo markings.

Adagio [a-da-shgee-oh] – slow

Andante [ahn-don-teh] – a walking pace

Allegro [a-leg-row] – fast, happy with energy

1. Draw a line from the term to the animal that matches the tempo marking.

Adagio

Andante

Allegro

Fingerboard Power! Each place we set our fingers on the “A” string is a pitch and has a letter name. As we set fingers on to the fingerboard, we go forward through the music alphabet. The letter “C” has a sharp. This is called a **sharp**. Second finger on the A string plays “C-sharp.”

2. Write the “A” string letters in each house and the finger number in the circle.

What do you hear? #3

You will hear 4 notes. If the 4 notes you hear are fast, circle Allegro. If the 4 notes you hear are slow, circle Adagio.

1

2

3

f or *p*

f or *p*

* Additional ear training exercises can be found on p. 95 & 97.

Choose from these examples for #1-3 and play it fast, or slow. For #4-6 add forte or piano to an example below.

Lesson 8

This is a **staff**. The staff is made up of **5 lines and 4 spaces**. We start numbering the lines and the spaces on the lowest line or the lowest space and count up.

1. Write the numbers on the lines.

2. Write the numbers in the spaces.

A **space note** sits between two lines. A **line note** has a line through the middle of the note head.

Space Note

Line Note

3. Draw 3 space notes between the lines.

4. Draw 3 line notes on the line.

Color all the space notes green and the line notes blue.

6. Write the line or space number for each note in the blank.

Line _____

Space _____

Line 2

8. Draw the note in the correct space.

Space 2

Space 4

Space 3

Space 1

9. Write the total number of beats for each note in the heart.

Lesson 9

The violin, viola, and cello all use a different clef to read music. Violinists use the treble clef. Violists use the alto clef. Cellists and bassists use the bass clef.

Treble Clef

Alto Clef

Bass Clef

This is the **treble clef**. Treble means high. The treble clef shows the high notes on the staff. It is also called the “**G clef**” because it wraps around the “**G**” line on the staff. Violinists read music using the treble clef.

This is the **alto clef**. The alto clef shows the middle notes on the staff. It is also called the “**C clef**” because it points to the line on the staff where “**C**” lives. Violists read music using the alto clef.

This is the **bass clef**. The bass clef shows the low notes on the staff. We pronounce the name, bass like “base” in baseball. Sometimes it is called the “**F clef**” because it shows note “**F**” on the staff. Cellists and double bassists read music using this clef.

1. Color the treble clef blue, the alto clef green, and the bass clef purple.

2. Help the ranch hands round up the cows.

- Draw a square around the quarter note cows.
- Draw a triangle around the half note cows.
- Draw a heart around the dotted half note cows.
- Draw a circle around the whole note cows.

Lesson 10

How to draw a treble clef.

Step 1: First draw a **VERY TALL J**.

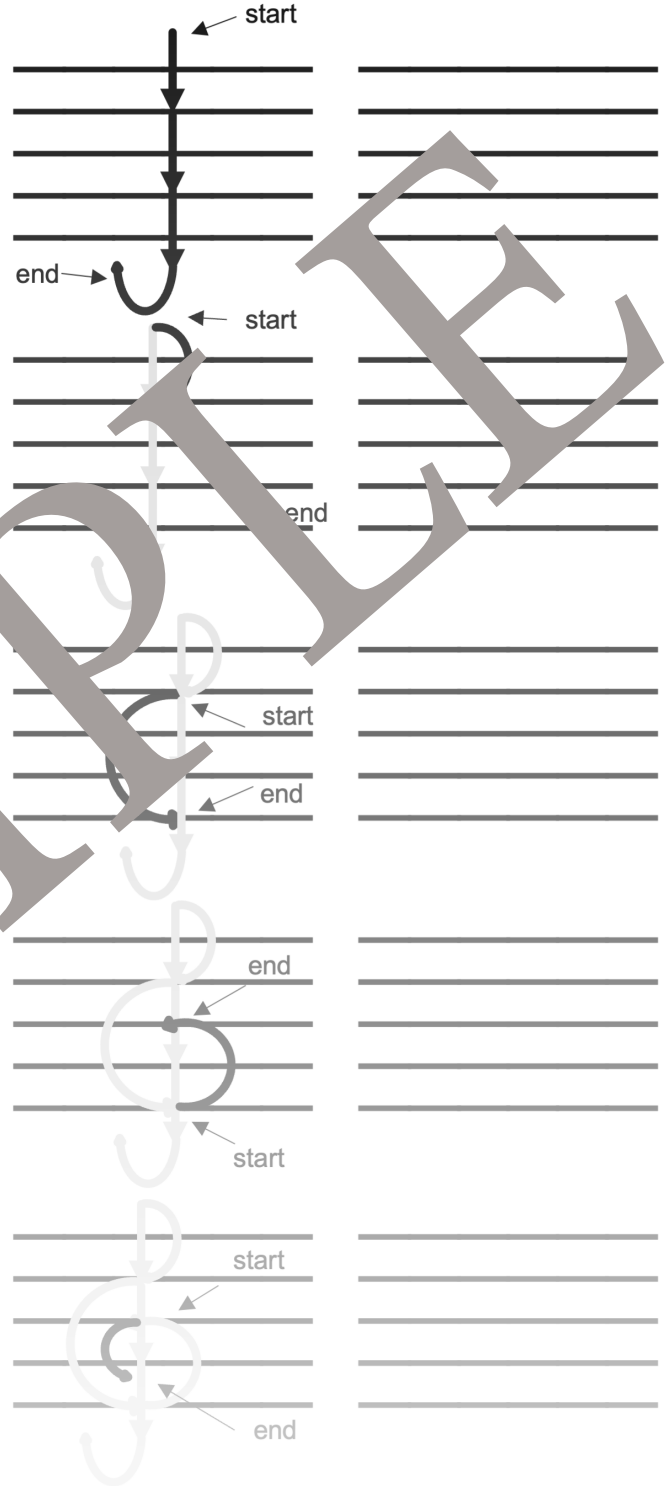

Step 2: Then draw a **Capital D** from the top of the J to touch line 4.

Step 3: Then draw a **BIG C**, from line 4 to touch the "tall J" at line 1.

Step 4: Draw another **BIG C**, from the bottom of line 1 to touch line 3.

Step 5: Then add a **little C** around line 2.

1. Draw each step on the empty staff.

2. Following the steps above, trace the treble clefs on each staff below.

3. Following the steps on p. 32, draw a treble clef on each staff below.

4. Draw a line matching the clef to the instrument that reads music using that clef.

5. Circle the treble clefs that are drawn correctly. Draw an X through the treble clefs that are incorrect.

What do you hear? #4

You will hear 3 notes. If you hear the same note 3 times, circle "SAME." If you hear 3 notes that are different, circle "DIFFERENT."

Bass Clef

Treble Clef

3. Draw the note in the box that matches the number of beats.

4. Write the line or space number for each note.

Line ____

Line ____

Space ____

Line ____

5. Forte means _____. 6. Piano means _____.

Did you know?

??

Before computers were invented, music was written by hand. Composers gave their music to a **copyist** who would neatly write out the music. The pens that were used to write music had a wide tip called a nib. These pens are sort of like calligraphy pens today. When composers drew a curved line with a wide nib, the thickness of the line would change. Composers never picked up their pen and colored the sides of the notes. It was just how the pen worked. When the typewriter and computer were invented, font designers kept the look of how copyists drew music notes and symbols with the old pens. Can you see how the thickness of the line changes with the wide nibbed pen?

Because your pencil has a sharp point and not a wide nib, the line in the notes you draw will not change thickness. You should not color in the sides of the notes to make them thicker. With a pencil, only draw music notes with a thin line.

Music Font

Handwritten

1. Draw the symbol in each box with a pencil using a thin line.

Lesson 12

When we step up in the music alphabet, we move forward through the music alphabet. As we step up, the pitch moves higher. When we step down in the music alphabet, we move **backwards** through the music alphabet and the pitch goes down.

1. Fill in the blanks with the correct letter.

A – step up – land on _____

C – step up – land on _____

E – step up – land on _____

G – step up – land on _____

G – step up – land on _____

E – step down – land on _____

B – step down – land on _____

F – step down – land on _____

A – step down – land on _____

C – step down – land on _____

2. When we step up, we move _____ through the music alphabet
(forward / backward)

and the pitch goes _____. When we step down, we move _____
(up / down) (forward / backward)

through the music alphabet and the pitch goes _____.
(up / down)

3. This little chirpy chick got lost. Can you help her find her way back to her family?
Following the directions, write in the letter in each corn kernel to step up or down.

4. What letter finally got the chick home? _____

BONUS: Using your instrument, play the baby chick's path.

Lesson 13

1. Circle if the two letters are stepping up or stepping down.

D to E = step up or step down

G# to F# = step up or step down

B to A = step up or step down

C# to D = step up or step down

G# to A = step up or step down

A to B = step up or step down

To step up from D we land on _____. There are two ways to play E on the violin: 4th finger on the A string or open E. **These E's are the SAME** NOTE. This is a repeated note even though they are on different places on the fingerboard. They sound the same pitch!

2. Draw a line from the finger number on the basketball to the letter that finger plays on the A string.

Fingerboard Power! The fingers on the E string each have a letter name. As we set fingers onto the fingerboard, we move forward through the music alphabet starting on E. Two letters have sharps (#) on the E string, F# and G#.

3. Write the E string letters in each house. Write the finger number in the circle.

4. Help Alexander Alligator play golf. Match the golf ball with the E string finger number to the flag with the E string letter that finger plays.

Lesson 14

Fingerboard Power!

Stepping Up

To **step up** on the fingerboard, place the next finger onto the fingerboard.

Stepping Down

To **step down** on the fingerboard, lift a finger off the fingerboard.

1. On the fingerboard, draw a circle that is a *step up* from the letter in the house. Then, write the letter name in the circle. Finally, fill in the blanks in the gray box.

Letter: A – step up – land on _____
Finger: 0 – step up – play finger ____.

Letter: B – step up – land on _____
Finger: ____ – step up – play finger ____.

Letter: C# – step up – land on _____
Finger: ____ – step up – play finger ____.

Letter: D – step up – land on _____
Finger: ____ – step up – play finger ____.

2. On the fingerboard, draw a circle that is a *step down* from the letter in the house. Then, write the letter name in the circle. Finally, fill in the blanks in the gray box.

Letter: E – step down – land on _____
 Finger: 4 – step down – play finger ____.

Letter: D – step down – land on _____
 Finger: ____ – step down – play finger ____.

Letter: C# – step down – land on _____
 Finger: ____ – step down – play finger ____.

Letter: B – step down – land on _____
 Finger: ____ – step down – play finger ____.

3. Step! Fill in the missing music alphabet letters.

Lesson 15

1. Fill in the gray box. Then, on the fingerboard draw a circle that is a *step up* or a *step down* from the letter in the house. Finally, write the letter name in the circle.

Letter: E – step up – land on _____

Finger: 0 – step up – play finger ____.

Letter: F# – step up – land on _____

Finger: ____ – step up – play finger ____.

Letter: G# – step up – land on _____

Finger: ____ – step up – play finger ____.

Letter: A – step up – land on _____

Finger: ____ – step up – play finger ____.

Letter: B – step down – land on _____

Finger: 4 – step down – play finger ____.

Letter: A – step down – land on _____

Finger: ____ – step down – play finger ____.

Letter: G# – step down – land on _____

Finger: ____ – step down – play finger ____.

Letter: F# – step down – land on _____

Finger: ____ – step down – play finger ____.

Steps are always one finger to the next finger. There are 2 kinds of steps, a **half step** and a **whole step**. A half step is the smallest step. It is when the fingers are close together. A whole step is 2 half steps together and there is space between the fingers.

Half Step

A half step is when your fingers are close together. It is the closest that two notes can be.

Whole Step

A whole step is 2 half steps together. There is a space between your fingers.

2. Circle the finger numbers that are a half step on the fingerboard picture.

1 & 2

2 & 3

3 & 4

3. Circle the finger numbers that are a whole step on the fingerboard picture.

1 & 2

2 & 3

3 & 4

??

Did you know?

An open string up to the 1st finger tape is also a whole step, even though it only uses 1 finger!

Lesson 16

Stepping on the staff

Notes can step up and down on the staff. When a note steps up on the staff, it moves from a space to the next line, or from a line to the next space.

step up
space note to line note

(space 3, step up, line 4)

step up
line note to space note

(line 3, step up, space 3)

When a note steps down on the staff, it moves from a space to the next line, or a line to the next space.

step down
space note to line note

(space 2, step down, line 2)

step down
line note to space note

(line 2, step down, space 1)

1. Draw a note below that steps **UP** from the given note.

2. Draw a note below that steps **DOWN** from the given note.

A **repeated note** stays on the same line or space.

same space

same line

3. Following the directions at the top of each box, draw a circle on the fingerboard that steps up or steps down from the house. Then write the letter for the printed house in the first blank. Write the letter for the circle in the second blank.

Step Up	Step Up	Step Down	Step Down
____ step up, land on ____	____ step up, land on ____	____ step down, land on ____	____ step down, land on ____

4. Draw a whole note on the line or space listed under each staff. Then, draw another whole note that steps up, steps down, or repeats.

Space 1 Step Up	Space 1 Step Down	Space 3 Step Up	Line 1 Repeating
Line 4 Step Up	Line 2 Step Down	Space 4 Step Up	Space 3 Repeating

What do you hear? #5

Place a coin in each circle. You will hear 4 notes for each question. If the notes you hear step up, push the coin up to the sky. If the notes you hear step down, push the coin down to the ground.

Choose from these examples:

Lesson 17

1. Write the letter for each house on the A string and E string. Then, write the finger number in the circle.

Half Step
Fingers are close together.

Whole Step
Space between fingers

2. Write W if distance between the notes is a whole step. Write H if the distance between the notes is a half step.

Open A to 1st finger B = _____

1st finger B to 2nd finger C# = _____

2nd finger C# to 3rd finger D = _____

3rd finger D to 4th finger E = _____

Open F to 1st finger F# = _____

1st finger F# to 2nd finger G# = _____

2nd finger G# to 3rd finger A = _____

3rd finger A to 4th finger B = _____

3. Write the number in each box. Write the total number of beats each note gets in the heart.

Quarter Note
Stem Up

Quarter Note
Stem Down

Half Note
Stem Up

Half Note
Stem Down

Whole Note

4. If the houses on the fingerboard are a half step, write "H" in the blank. If the houses are a whole step write, "W" in the blank.

5. Circle the hidden music notes and clefs in the picture.

Can you find?

- 3 Treble clefs
- 1 Bass clef
- 10 Alto clefs
- 2 Whole notes
- 2 Quarter notes
- 4 Half notes

Lesson 18

Each pitch has a house on the fingerboard and a matching house on the staff. We use notes to show the staff house of each pitch.

Open A is a space note and lives on the staff in space 2.

1. Trace the treble clef. Draw 3 "A" whole notes on the staff. Write the letter below.

A (space 2) – step up – land on line 3.

2. Trace the treble clef. Draw 3 "B" whole notes on the staff. Write the letter below.

Did you know?

Always draw a sharp (#) on the *left* side of the note. A sharp looks like a tic-tac-toe board and the middle square is on the same line or space as the note.

B (line 3) – step up – land on C# (space 3).

3. Trace the treble clef. Draw 3 "C#" whole notes on the staff. Write the letter below.

C# (space 3) – step up – land on D (line 4).

4. Trace the treble clef. Draw 3 “D” whole notes on the staff. Write the letter below.

Line 4 = D

D (line 4) – step up – land on E (space 4).

5. Trace the treble clef. Draw 3 “E” whole notes on the staff. Write the letter below.

Space 4 = E

6. Trace the treble clef. Draw the 5 A string notes on the staff. Write the finger number on the line under each note.

Letter Name: A B C# D E

Finger Number: _____

Discover the Composers

7. Fill in the letter of each note to learn about the life of a great composer.

True or False

4. A half step is when your fingers are far apart.

True or False

5. A whole step is when your fingers are far apart.

True or False

6. On the A string - D up to E is a whole step.

True or False

7. On the A string - B up to C# is a whole step.

True or False

8. On the A string - C# up to D is a whole step.

9. Draw a treble clef on each blank staff.

10. Write the number of beats in each heart.

11. Circle the pairs of stepping notes. Draw an X on the pairs that do not step.

12. Draw a whole note that **steps down** from the given note.

13. Draw a whole note that **steps up** from the given note.

14. Trace the treble clef. Draw a whole note on the staff that is the given letter.

A

C#

E

Lesson 20

The staff lines are divided by **bar lines**. The space between the bar lines is called a **measure**. Bar lines start at line 5 and end at line 1. There is a bar line at the beginning of each staff. At the end of a piece, you will see a **double bar line**. A **double bar line** is a thin line followed by a thick line.

1. Trace the dots to draw bar lines and create measures.

2. On the staff below draw in 3 bar lines and a double bar line at the end.

3. On the staff below, draw an arrow pointing to each bar line. Draw a box around the double bar line.

4. On the staff below, draw a circle around each measure.

6. Draw a circle on the fingerboard that matches the note on the staff.

Four fingerboard diagrams are shown, each with a treble clef staff below it. The fingerboards are labeled G D A E at the top. The staves show the following notes: G4, A4, B4, and C5. The fingerboards have four circles numbered 1 to 4 on the right side, corresponding to the strings G, D, A, and E respectively.

7. Circle the fingerboards whose houses are a half step apart. Draw an X over the fingerboards whose houses are a whole step apart.

Four fingerboard diagrams are shown, each with a treble clef staff below it. The fingerboards are labeled G D A E at the top. The staves show the following notes: G4, A4, B4, and C5. The fingerboards have four circles numbered 1 to 4 on the right side, corresponding to the strings G, D, A, and E respectively. The diagrams show the placement of the 'house' (the space between the strings) for each note.

8. On the A string, the half step is between finger numbers _____ and _____.

The letters for these fingers are _____ and _____.

Lesson 21

A **time signature** is the two numbers stacked on top of each other. The time signature is printed on the first line of a piece immediately after the clef sign. The top number of a time signature tells us how many beats are in each measure. The bottom number of the time signature tells us what kind of note gets one beat. A **4 on the bottom means the quarter note gets 1 beat**.

1. Circle the top number of the time signatures. Draw a square around the bottom number of the time signature. Fill in the blanks for each time signature.

____ quarter notes in each measure

6
4

____ note gets 1 beat

____ quarter notes in each measure

2
4

____ note gets 1 beat

____ quarter notes in each measure

5
4

____ note gets 1 beat

____ quarter notes in each measure

3
4

____ note gets 1 beat

2. Count the beats in each measure and fill in the top number of the time signature.

3. Write the number of beats for each note in the heart.

Beats:      

4. Since the time signature is 4/4 in question 3, there should be a total of 4 beats in each measure. Look at each measure above and add up the number of beats in each measure. Does each measure equal 4 beats? Circle the answer: YES NO

5. Write the number beats for each note in the heart.

Beats:      

6. This time signature is 2/4. There should be a total of 2 beats in each measure. Add up the number of beats in each measure above. Does each measure have 2 beats? Circle the answer: YES NO

We count the beats in each measure. Each beat gets one number. We start our counting over at the beginning of the next measure. Do you see how each measure has 4 counts? Use your finger and point to each note and say the *counts* out loud.

1 beat = 1 count 2 beats = 2 counts 3 beats = 3 counts 4 beats = 4 counts

Beats:       

Counts: 1 2 3 4 1 2 3 4 1 2 3 4

Lesson 22

Fill in the blanks. Then, write the number of beats for each note in the hearts. Write the counts for each measure in the blanks.

1. Time Signature: There are _____ beats in each measure. The _____ gets 1 beat.

Beats:

Counts: _____

2. Time Signature: There are _____ beats in each measure. The _____ gets 1 beat.

Beats:

Counts: _____

3. Time Signature: There are _____ beats in each measure. The _____ gets 1 beat.

Beats:

Counts: _____

4. Draw in the missing bar lines. Remember the beats in each measure should add up to the top number of the time signature.

Three musical staves for exercise 4. Each staff has a treble clef and a time signature. The first staff is 4/4, the second is 5/4, and the third is 3/4. Each staff contains a sequence of notes with missing bar lines.

5. Write the top number of the time signature in the box.

Three musical staves for exercise 5. Each staff has a treble clef and a time signature. The first staff is 4/4, the second is 4/4, and the third is 4/4. Each staff contains a sequence of notes with missing bar lines.

Lesson 23

To show the notes that are higher or lower than the 5 lines on the staff, we can extend the staff up and down using little lines that look like ladders. These little lines are called **ledger lines**.

1. Draw the ledger line note on the empty staff next to each note.

2. I have 6 quarter notes in each measure. What is my time signature? _____

3. I have 2 quarter notes in each measure. What is my time signature? _____

4. Write the letter names under each note.

Two musical staves are shown. The first staff contains five whole notes: C4 (first space), D4 (second space), E4 (third space), F4 (third space), and G4 (fourth space). Below each note is a blank line for writing the letter name. The second staff contains five whole notes: C4 (first space), D#4 (second space with a sharp sign), E4 (third space), F#4 (third space with a sharp sign), and G4 (fourth space). Below each note is a blank line for writing the letter name.

5. Draw a treble clef on each empty staff. Draw a whole note for the letter on the staff.

Six empty musical staves are arranged in two rows of three. Below each staff is a letter: C#, E, D, E, A, and B. The student is instructed to draw a treble clef on each staff and then draw a whole note on the staff corresponding to the letter below it.

6. Write the top number of the time signature in the box.

Two musical staves are shown, both starting with a treble clef and a box for the time signature. The first staff contains a sequence of notes: a quarter note (C4), a quarter note (D4), a quarter note (E4), a quarter note (F4), a dotted quarter note (G4), a quarter note (A4), and a half note (B4). The second staff contains a sequence of notes: a quarter note (C4), a quarter note (D4), a quarter note (E4), a quarter note (F4), a dotted quarter note (G4), a quarter note (A4), and a quarter note (B4). The student is to write the top number of the time signature in the box for each staff.

What do you hear? #6

Place a coin on each coconut. If the notes you hear step up, push a coin up to the top of the tree. If the notes you hear step down, push a coin down to the ground.

The Magic of Music Theory Primer - © 2024 Horseshair Music. Photocopying prohibited.

Choose from these examples:

Lesson 24

Remember that 4th finger on the A string is E. It is the same note as open E.

Open E is a space note and lives on the staff in space 4.

1. Trace the treble clef. Draw 3 "E" whole notes on the staff. Write the letter below.

??

Remember!!! Always draw a sharp (#) on the left side of the note head. It looks like a tic-tac-toe board. Draw the middle square of the sharp on the same line or space as the note.

E (space 4) – step up – land on F# (line 5).

2. Trace the treble clef. Draw 3 "F#" whole notes on the staff. Write the letter below.

F# (line 5) – step up – land on G# (sits on top of the staff).

3. Trace the treble clef. Draw 3 "G#" whole notes on the staff. Write the letter below.

G# (on top of staff) – step up – land on A (ledger line 1).

4. Trace the treble clef. Draw a ledger line and a whole note on the line. Draw 3 "A" whole notes on the staff. Write the letter below.

A (ledger line 1) – step up – land on B (space above ledger line 1).

5. Trace the treble clef. Draw a ledger line and a whole note on top of the line. Draw 3 "B" whole notes on the staff. Write the letter below.

6. Trace the treble clef. Draw the 5 E string notes on the staff. Write the finger number on the line under each note.

Letter Name: E F# G# A B

 F# – Teal
 G# – Orange
 High A – Pink
 High B – Gray

?? *Did you know?*

When we plucks the strings, it is called **pizzicato** [pits-ih-ca-toe], or **pizz.** [pits] for short. When we play with the bow it is called **arco** [ahr-co]. “Water Droplets” is all pizzicato!

Lesson 26

1. Draw a line to the correct part of the bow.

screw frog grip wrapping stick horsehair tip

Bowing Symbols

Tone is the sound that the violin makes when it plays. How each note starts and ends is called **articulation**. For stringed instruments, the bow does most of the articulation work. **Detaché** [day-ta-shay] means separated. Detaché is the basic bow stroke we use to play our instrument. In the detaché bow stroke the bow alternates between down bows and up bows. Sometimes we refer to this as "separate bows."

This symbol means to use a down bow. A down bow pulls the bow from frog to toward the tip.

This symbol means to use an up bow. An up bow pushes the bow from tip to toward the frog.

2. *Twinkle, Twinkle Little Star* begins with a _____ (draw the symbol) and uses detaché bow strokes.

3. Practice drawing the down bow and up bow symbols by write the correct bow symbol above each note. The first one is done for you.

You should NOT write a bow symbol above every note in your music. This exercise is only practice for writing bow markings. The first note of a piece will usually have a bowing symbol telling you how to begin. Bow marks are only written over a few notes in a piece. If there is no bow marking, play detaché bows. If there is a change in the down up pattern, a bow marking will be added.

4. Circle whether the action in the picture is moving up or down.

☐ or ☐

☐ or ☐

☐ or ☐

☐ or ☐

☐ or ☐

☐ or ☐

5. In each box fill in what bow direction the bow is playing.

6. Write the term next to the definition. (*articulation, détaché, tone*)

_____ - the sound that the violin makes when it plays.

_____ - how a note starts or ends.

_____ - separate bows.

?? *Did you know?*

- ❑ Did you know that bows used to look like this? The stick of the bow curved up, rather than down like the modern bow.
- ❑ There are about 150 horsehairs on a violin bow, and about 200 horsehairs on a cello bow.
- ❑ Horsehair comes from horses that live in very cold climates like Mongolia, Siberia, and Canada. The hair they grow is strong and thick. It's just what is needed for bow hair.
- ❑ Bleaching horsehair weakens it so bow hair comes from white horses that have white hair. Some bass players like to play with black horsehair. Black horsehair is thicker and grips the thick strings of a bass better.
- ❑ Bow makers clean and sort the horsehair. They call this "dressing" the hair. In dressing the hair, they discard hairs that are not perfect or that are too short.
- ❑ Why is it called a frog? No one is really sure. One theory is that the frog of the bow is also known as the "heel" of the bow, and the soft part in a horse's hoof or heel is called the frog. Maybe they decided the heel of the horse, and the heel of the bow could both be called the frog. We will never know!
- ❑ Rosin is made from pine sap. Each rosin maker has his own "secret recipe."
- ❑ Wipe the rosin off your instrument after you play as the small particles can damage and dull the shiny surface of your instrument.
- ❑ The oils on your fingers stick to the horsehair. When the oil is on the horsehair it attracts dirt. To keep the horsehair on your bow clean and working well. Do not touch the horsehair with your fingers!

Music Note Bowling

Preparing to play:

1. Cut out each card and cut down the center on the dotted line.
2. Group the cards with staff notes in one pile, and the cards with bowling balls in another pile.
3. Take the staff note cards and spread them out face down.
4. Take the bowling ball cards and spread them out face down.

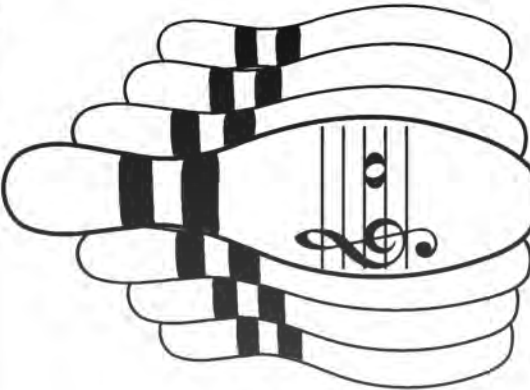

How to play with one player:

1. Turn one card over in each group. If the letter on the bowling ball does not match the staff note, turn both cards back over, face down.
2. Continue turning one card over in each group until you find a match.
3. Your goal is to match all the staff cards to the correct letter on the bowling ball card.

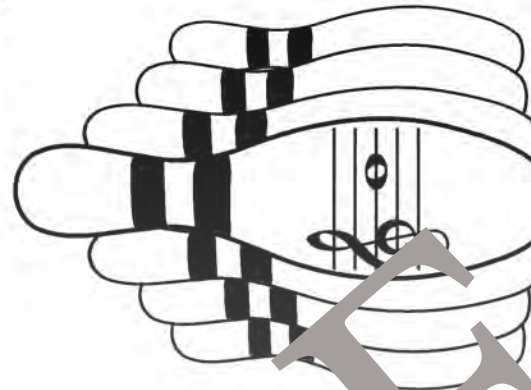

How to play with two or more players:

1. The first player turns over one bowling ball card and one staff card. If the cards match, that player takes both the cards and sets them aside. If the cards do not match, the player turns both cards over.
2. If the player has a match, he takes another turn. If the player does not have a match, the next player takes a turn looking to find a match.
3. Continue until all the cards in both piles have been matched.

Glossary

- Adagio** – [tempo] Italian word meaning slow. (p. 26)
- Allegro** – [tempo] Italian word meaning fast, happy with energy. (p. 26)
- Alto Clef** – Violas read music using the alto clef. Sometimes called the C clef because the clef points to C line on the staff. (p. 30)
- Andante** – [tempo] Italian word meaning walking speed. (p. 26)
- Arco** – Italian word meaning play with the bow. (p.71)
- Articulation** – How a note begins and/or ends. (p. 70)
- Bar Line** – A vertical line that touches lines 1 and 5 to create measures. (p. 56)
- Bass Clef** – Cellos and basses read music using the bass clef. Sometimes called the F clef because the clef points to F line on the staff. (p. 30)
- Detaché** – [bowing] French word meaning detached. Each note is played with a separate bow stroke. (p. 70)
- Dotted Half Note** – Gets 3 beats in 4/4 time. (p. 23)
- Double Bar Line** – A thin line by a thick line. Signals the end of the piece. (p. 56)
- Down Bow** – [bowing] Moving the bow from frog toward the tip. (p. 70)
- Dynamics** – Volume; how loud or soft to play notes. (p. 10, 21)
- Forte** – [dynamic] Italian word meaning loud. (p. 21, 34)
- Half Note** – Gets 2 beats in 4/4 time. (p. 20)
- Half Step** – closest distance between two notes; fingers are close together on the fingerboard. (p. 44, 48)
- Harmony** – When two or more notes sound together at the same time. (p. 10)
- Ledger Line** – A small line that extends the staff. It can be above or below the 5 staff lines. (p. 62)
- Measure** – The space in between bar lines. (p. 56)
- Music Alphabet** – First seven letters of the English alphabet. (p. 10, 22)
- Note Head** – The round part of a note. (p. 19)
- Open String** – Playing a string without fingers. (p. 11)
- Piano** – [dynamic] Italian word meaning soft. (p. 21, 34)
- Pitch** – the sound of each note. (p. 10)
- Pizzicato** – Italian word meaning pluck the string. Abbreviated *pizz.* (p. 71)
- Quarter Note** – Gets 1 beat in 4/4 time. (p. 19)
- Rhythm** – How long or short a pitch is held. (p. 10, 19)
- Staff** – 5 lines and 4 spaces that show pitches. (p. 28)
- Stem** – The line that goes up on the right or down on the left side of a note head. (p. 19)

Step – The letter before or after a letter in the music alphabet. The line or space above or below a note on the staff. The finger number before or after a finger on the fingerboard. (p. 37, 39, 41, 44, 45, 48)

String Orchestra – A group of musicians who only play stringed instruments. (p. 7)

Symphony Orchestra – A group of musicians who play woodwind, brass, percussion, and string instruments. (p. 7)

Tempo – Speed, how fast or slow music is played. (p. 26)

Time Signature – Found at the beginning of a piece. Top number tells the number of beats in each measure. The bottom number tells what kind of note gets 1 beat. A 4 on the bottom means the quarter note gets one beat. (p. 58)

Treble Clef – Violins read music using the treble clef. Sometimes called the G clef because the clef points to G line on the staff. (p. 30, 32)

Up Bow – Moving the bow from the tip toward the frog. (p. 70)

Whole Note – Gets 4 beats in 4/4 time. (p. 24)

Whole Step – 2 half steps together. Space between fingers on the fingerboard. (p. 44, 48)

Extra Ear Training Practice A: High or Low & Open Strings

If you hear high notes, color the bird. If you hear low notes, color the worm.

1

2

3

If you hear high notes, color the cloud. If you hear low notes, color the flowers.

4

5

6

Color the house of the open string that you hear.

7.

9.

Choose from these examples.

For questions 7-9, choose a rhythm pattern to play on an open string.

Extra Ear Training Practice B: Loud or Soft & Open Strings

If you hear loud, color the roaring hippo. If you hear soft notes, color the frog.

1

2

3

If you hear loud notes, color the boy yelling. If you hear soft notes, color the girl reading.

4

5

6

Color the house of the open string that you hear.

7.

8.

9.

Choose from these examples and add a dynamic *f* or *p*.

For questions 7 - 9, choose a rhythm pattern to play on an open string.

Extra Ear Training Practice C: Long and Short Patterns

You will hear several notes for each box. When you hear a long note, draw a line. When you hear a short note, draw a dot. Draw all of the notes that you hear in the order that you hear them.

1.

2.

3.

4.

Choose from these examples.

Extra Ear Training Practice D: Adagio or Allegro

If the music you hear is slow, circle Adagio. If the music you hear is fast, circle Allegro.

1

2

3

4

5

6

Choose from these examples play it fast, or slow.

Extra Ear Training Practice E: Same or Different

If you hear the same note 3 times, circle the cupcakes that are the same. If you hear 3 notes that are different, circle the cupcakes that are different.

1.

SAME

DIFFERENT

2.
